

YOUR DEDICATED FUMIGATION EXPERTS

Specialty Pest Services
for **Protein Processing**

Ready to tackle any challenge

The warm, humid environments and challenging infrastructure of protein plants provide ideal conditions for cockroaches, rodents and flies. Protecting your product quality and business means periodic fumigation along with regular pest elimination service.

Minimized downtime

The precise and tailored method of Ecolab fumigation reduces process duration and amount of fumigant used, ensuring safe environments with limited downtime.

Peace of mind

Preventing contamination is essential to ensuring the food safety and quality of your protein products. Ecolab fumigation and pest services take the worry of pest contamination out of your hands—and off your mind.

Safety

At Ecolab, safety is a top priority—from certifying the safe application of fumigation to ensuring the food safety of your product. We understand the sensitive nature of proteins and follow all specifications and regulations.
