

COCKROACHES ARE A SERIOUS RISK TO YOUR BUSINESS

Cockroaches are a major threat to food safety, public health and your brand reputation.

Cockroaches are known **PUBLIC HEALTH PESTS** that carry and spread bacteria such as *E. coli* and *Salmonella*

A **SINGLE SIGHTING** of a cockroach by a health inspector can lead to a **SHUTDOWN**

75% of customers would **never** visit a business implicated in a **FOOD SAFETY INCIDENT***

Ecolab's Cockroach Multi-Station provides best-in-class monitoring and protection and it is available in **Ecolab's Cockroach Service**, which uses science-based protocols and equipment to proactively identify, eliminate, and prevent cockroach risks. The Ecolab Cockroach Service will help protect your brand and bottom line, today and in the future.

Cockroach Multi-Station: Early Detection and Ongoing Defense

Sleek and Discreet Design

- Patented equipment is quickly installed on any surface type
- The station is concealed and protected, making it ideal for housing cockroach bait that will continually eliminate cockroaches at their source
- Unique design mimics cockroach harbourages and curvature captures cockroaches on their backs, improving catch rates

"I was really impressed with how quickly the Ecolab team got after the problem and their ability to identify where the cockroaches were coming from. The cockroach multi-stations that they used kept out of the way of my staff, and I think this made a big difference. The fact that the cockroaches aren't visible means that we can be confident that monitoring is happening out of sight and the Ecolab team let us know what needs to happen if we do have a problem."
