

VIRUCIDAL DISINFECTION TREATMENT

It is more important than ever to ensure your facilities are clean and maintained to the hygiene standard that will help prevent the spread of viruses. Invest now in a deeper and more hygienic disinfection treatment to kill harmful bacteria and viruses, enabling your business to continue to operate in a safe, healthy environment.

**ECOLAB HELPS YOU PROTECT YOUR CUSTOMERS,
YOUR EMPLOYEES AND YOUR BUSINESS.**

Our professional disinfection services are carried out by our specialist teams, in accordance with industrial hygiene and safety practices. With a team visiting your premises at a convenient time to suit you and once the treatment is complete it's business as usual.

The disinfection treatment is carried out by our Ecolab **team of experts** utilising **Electrostatic Spraying** technology, combined with Ecolab's proprietary Desguard 20 disinfectant, proving to be a highly effective and targeted method of application. Desguard 20 is a **bactericidal and virucidal** product which is highly effective against enveloped viruses such as COVID-19 (conforms to the European standard EN 14476).

It is ideal for disinfecting frequently touched contact surfaces such as doors, tables, banisters, light switches, desks, toilets and bathrooms, chairs, vending machines, etc.

It is specially designed to be used as part of a controlling cross infection procedure* in:
Food and Beverage production facilities, Health care establishments, Schools, Leisure facilities, Restaurants & other public areas.
